1. What is Linux?
A. Database Management System
B. Operating System Kernel
C. Programming Language
D. Web Browser
answer: Operating system kernel

2. Ubuntu is:
A. Web Server
B. Programming Language
C. Linux Distribution
D. Database
answer: Linux distribution

3. What does WSL stand for?
A. Windows Service Loader
B. Web System Linux
C. Windows Subsystem for Linux
D. Windows Software Layer
answer: windows subsystem for Linux

4. Linux is mainly used for:
A. Gaming Only
B. Servers and Development
C. Video Editing Only
D. Graphic Designing
answer: servers and development

5. Which company developed WSL?
A. Google
B. Apple
C. Microsoft
D. Oracle
answer: Microsoft

6. Which command displays the current working directory?
A. ls
B. pwd
C. whoami
D. mkdir
answer: pwd

7. Which command lists files and folders?
A. pwd
B. hostname
C. ls
D. date
answer: ls

8. Which command displays the current logged-in user?
A. hostname
B. pwd
C. whoami
D. mkdir
answer: whoami

9. Which command shows the system hostname?
A. hostname
B. whoami
C. pwd
D. ls
answer: hostname

10. Which command displays the current date and time?
A. time
B. clock
C. date
D. cal
answer: date

11. Which command displays Linux system information?
A. pwd
B. ls
C. uname -a
D. hostname
answer: uname -a

12. Which command creates a new directory?
A. touch
B. mkdir
C. ls
D. pwd
answer: mkdir

13. What is the purpose of pwd?
A. Create Folder
B. Show Current Directory
C. Delete Folder
D. Show User
answer: show current directory

14. What is the purpose of ls?
A. List Files and Directories
B. Show User
C. Create Directory
D. Display Date
answer: list files and directories

15. What is the purpose of whoami?
A. Show System Name
B. Show Current User
C. Show Date
D. Show Directory
answer: show current user

16. What is the purpose of hostname?
A. Show Current User
B. Show System Name
C. Create Directory
D. Show Date
answer:show system name

17. What is Ubuntu?

A. Linux Distribution
B. Text Editor
C. Browser
D. Programming Language
answer:linux distribution

18. Ubuntu is installed on Windows through:
A. Git
B. Docker
C. WSL
D. Kubernetes
answer: wsl

19. Which command would you use to verify Linux kernel information?
A. pwd
B. ls
C. uname -a
D. mkdir
answer: uname -a

20. Which command is used to create multiple directories?
A. pwd
B. whoami
C. mkdir
D. hostname
answer: mkdir

PART B – THEORY QUESTIONS (15 Questions)

1. Define Linux.
answer:linux is an open source operating system based on unix that runs on computers, servers etc

2. What are the advantages of Linux?
answer: high security
great stability
complete control over the computer

3. Why is Linux widely used in DevOps?
answer: major cloud platforms like aws and azure use Linux as the default os and tools like docker and Kubernetes rely on Linux kernel features.

Explain the difference between Linux and Ubuntu.
answer:linux is an open source operating system based on unix that runs on computers, servers meanwhile ubuntu is a Linux distribution built on top of Linux kernel

6. What is Ubuntu?
answer: ubuntu is a Linux distribution built on top of Linux kernel that has package management tools and a user interface which makes a complete operating system.

7What is WSL?
answer:wsl is a free tool from Microsoft that lets you run a full Linux os inside windows

8. Explain the relationship between Windows, WSL, and Ubuntu.
Windows, WSL, and Ubuntu work together as layers to let you run a full Linux environment directly inside the Windows operating system

9. why do windows users install ubuntu through wsl?
Windows users install Ubuntu through the Windows Subsystem for Linux (WSL) to run native Linux tools and development environments directly inside Windows without the complexity of dual-booting or virtual machines

10. Explain how WSL helps developers.
Windows Subsystem for Linux helps developers by allowing them to run a GNU/Linux environment directly on Windows without the overhead of a traditional virtual machine or dual-boot setup.

11. Explain the purpose of the pwd command.
answer: its shows the current working directory

12. Explain the purpose of the ls command.
answer: it list all files and directory

13. Explain the purpose of the whoami command.
answer: its show current user
14. Explain the purpose of the hostname command.
answer: it shows the system name
15. Explain the purpose of the date, uname -a, and mkdir commands.
answer: uname-a command its shows the entire configuraton of Linux we are using
mkdir command is for to create new directories
date command is show the present date
